

S. M. Wilson Builds a Playhouse to Support Mercy Health Foundation!

Each year, the Mercy Health Foundation hosts a benefit for Mercy Kids which is a vital resource for children and their families offering compassionate medical care for every child, every need, every day.

Bates Architects asked to partner with S. M. Wilson to design and build an epic playhouse to be featured and auctioned off along with other playhouses built by local AEC partners at this year's Mercy Kids benefit. Eager to participate and support the Mercy Health Foundation, S. M. Wilson jumped at the opportunity...and the results are memorable!

The modern barn-style playhouse features a sliding barn door, a removable roof structure with a cargo net loft, an exterior planter box that will catch rainwater runoff from the roof, interior surfaces of chalkboard paint and magnetic panels, and bonus areas such as a deck and activity table for added fun!

[Watch an animation of the playhouse here...provided by Bates Architects.](#)
