

Warranty & Service

Warranty Service

Our commitment does not end when we turn a building over to an Owner. Our Warranty & Service team ensures that your building functions the way it was intended.

- After project completion, our Warranty & Service Coordinator will contact you every three months
- An 11-month warranty list will be executed for the walk-through
- Every six months, you will receive follow-up communication from our Warranty & Service Coordinator, even after warranty expiration
- Warranty dates will be tracked, and an 11-month walk-through with you and the architect will be established
